DETAILED ACTION

Applicants' response, filed 4 October 2005, has been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claims 1-15 are currently pending.

Claim Rejections - 35 USC § 112-1st paragraph

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 5-7, 12, 14, and 15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a new matter rejection.

Claim 5, 6, and 12 recite "within biopolymer information of biopolymers contained". This is new matter. The specification fails to disclose the searching of biopolymer information of biopolymers in the selected subtree for keywords available in a keyword dictionary. Instead, the specification discloses searching keywords themselves, as on page 20, line 9.

Claim Rejections - 35 USC § 112-2nd paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5-7, 12, 14, and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5, 6, and 12 recite “within biopolymer information of biopolymers contained in the selected subtree”. It is unclear what is intended by this step. What is “searching within biopolymer information of biopolymers”? Does Applicant mean searching keywords for biopolymer information or is there some other meaning? Clarification is requested.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Michaels et al. (Pacific Symposium on Biocomputing (1998) Vol. 3, pages 42-53).

In regard to claim 1, Michaels teaches clustering biopolymers with a first clustering method based upon gene expression data and displaying the results in a dendrogram (see page 44, Figure 1, a and b; see description of Figure 1, page 45). Michaels further teaches selecting a subtree and displaying the subtree in a separate window (see Figure 1a “wave” windows; Figure

Art Unit: 1631

2). Biopolymers of the selected subtrees are grouped into function groups, consisting of cell cycle function and metabolic function, and displayed separately, for example (Figure 3).

In regard to claim 2, two clustering methods are used (page 50, paragraphs 3-5).

In regard to claim 3, Michaels teaches the embodiments as in claim 1 above and he teaches replacing the subtree with an icon in the dendrogram (see Figure 1b, wave boxes replaces with 1, 2, 3, etc...icon designation).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art of Berno (WO/99/09218) has been withdrawn in view of the fact that the claims now recite "consisting of" in reference to the functional characteristics. Berno does not teach enzymatic, metabolic, transporting or cell cycle function.

Art Unit: 1631

Claims 4, 8-11, and 13 are objected to for being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or fairly suggest keyword searching and display in concert with the dendrogram display of gene expression data.
